## Education

### Aligarh Muslim University

B.Tech in Computer Engineering (CPI: 9.1)

Aligarh, UP, IND

Sept. 2022 – Present

## Relevant Coursework

- Operating Systems
- Database Management System
- Algorithms Data Structures
- Computer Networks
- Digital Logic System Design
- Bash Scripting

## Experience

### Software Developer Intern

Purpose Buddy

Nov 2024 – Jan 2025

Remote

- Contributed to development of an automation tool **Auto Appy** to optimize workflows.
- Researched and documented APIs for seamless integration.
- Contributed to production feature deployment, enhancing system stability.

## Projects

### Codecrux - AI-powered CS Interview Prep SaaS | *Next.js, React, Tailwind, OpenAI, Aceternity UI, LangChain.js*

Present

- Building an AI-powered SaaS platform to help users prepare for coding interviews efficiently.
- Integrating OpenAI to provide real-time problem-solving assistance and detailed explanations.
- Implementing personalized dynamic suggestions based on user progress and weak areas.

### Uber Clone | *Typescript, React, MongoDB, Redis, Node.js, Express, WebSockets*

Dec 2024

- Built ride-hailing features like ride requests, driver assignment, and payments.
- Optimized MongoDB queries for fast data retrieval.
- Implementing route Matching feature

### Decentralized Data Labeling Platform | *Typescript, React, Solana, Web3.js, AWS S3, Node.js, Express, MongoDB*

Feb 2025

- Developed a Web3-based crowdsourcing platform for data labeling with crypto payments.
- Integrated Solana blockchain for secure and verifiable transactions.
- Implemented AWS S3 for secure file storage with pre-signed URLs.
- Built frontend components to facilitate seamless user experience for task creation and payments.

### Bloggify - Blogging Platform | *Typescript, React, Node.js, Express, Postgres, Tailwind CSS*

Dec 2024

- Developed a full stack Blogging platform.
- Integrated versatile text editor with multiple format options.
- Planning to add NLP based topic tagging feature

## Technical Skills

### Languages:

C/C++, JavaScript, TypeScript, SQL, Bash, Assembly (x86/x85)

### Technologies:

Linux, Docker, Node.js, React, Next.js, Tailwind CSS, Redis, PostgreSQL, MongoDB, Kafka

### Tools:

Git, Docker, Postman, Prisma, QEMU, Makefile
